OUR COLOUR

Our base colour forms the monotone foundation of the brand and is used with white to ensure clarity and consistency.

Core colours support and enhance our palette. They should primarily be used at 100%, but can be used at 25% or 50% opacity for backgrounds, or highlights if needed.

For backgrounds or key elements like call-outs and stickers, the gradient accent colour can be used to create emphasis.

PRODUCT RANGES

Our accent colours, Mint, Peach, Sky, Sun, and Lavender, are used to distinguish the different product ranges within the wider brand family while maintaining a cohesive visual system.

These colours should be applied sparingly and with restraint, acting as subtle identifiers rather than dominant brand colours. As demonstrated on the packaging, they are best used for small highlights, category indicators, tabs, or supporting graphic elements.

OUR TYPOGRAPHY

Headings are in Cooper Light

Body copy is in Poppins Regular. Sometimes, we use **Poppins Semibold** to make sure nothing is missed.

Any text used in a CTA, pull-out or sticker is usually in Cooper Black.
